

Immigration to Minnesota

A solo-mission by Kristina / @gelicia

The Problem

Immigration population estimates are awesome, but hard to compare / visualize

<http://capitolcode.mn.>

[gov/data/#Immigration_Population_Estimates](http://capitolcode.mn.gov/data/#Immigration_Population_Estimates)

The **Work**

Firstly, country names are **hard**

Only a **loose standard** of what countries are named

- Burma == Myanmar
- Macau == Macao
- Countries that no longer exist

The **Solution**

<https://github.com/gelicia/capitolCodeImmigrant>

Kristina is an independent software engineer in
Minneapolis.
